QuickDelivery.com

December 28, 2021

Dear valued trucking customers,

Thank you for allowing us to handle your expedited freight deliveries as we appreciate the trust you put in us to perform efficiently and reliably for you.

We continually strive to maintain price points to perform competitively and expeditiously on your behalf. Like anyone else in virtually every line of business, costs have steadily risen and good labor has been harder to find. At this time there is a need to restructure our expedited trucking rates in order to maintain the efficiencies you have come to expect. Beginning January 3rd, expedited trucking rates will incur an increase, most notable for minimal shipments of less than three pallets. Please understand for those shipments, we are usually able to accommodate these using a sprinter or cargo van which not only can provide expedited service, but in addition a substantial cost savings.

If you have any questions or require additional information about these rates, please contact our sales sales@quickdelivery.com or customer service custserv@quickdelivery.com departments and we will be happy to assist.

Everyone at Quick Delivery Service wishes you a healthy and happy 2022.

Sincerely,

Tim Tullis

Director of Operations
